# INTEGRATING EDIT-ON PRO

*This small guide intends to give you the few steps required to integrate the Java HTML editor RealObjects edit-on Pro inside Jahia so that you can edit free text areas with edit-on Pro. Please note that edit-on Pro is a commercial product and that you have to purchase a license in order to use the editor in your production/live system. However, you are welcome to request a free 30 day trial license at: <http://www.realobjects.com>.*

## 1.1. EDIT-ON PRO 2.1

1. Download the 2.1 release of edit-on Pro here:

<http://www.realobjects.com/downloads>

You will need to complete a form to request a download link and a trial license key.

2. Extract the content of the directory "eopro" from the original archive file to :

TOMCAT\_HOME/webapps/jahia/jsp/jahia/htmleditors/eopro

3. Put in the same directory the license file "licensekey.xml" you should have received from RealObjects.

4. Open the following file :

TOMCAT\_HOME/webapps/jahia/WEB-INF/etc/htmleditors/htmleditors\_config.xml

and uncomment the following lines:

```
<!--
<editor>
<id>eopro</id>
<name>Edit On Pro 2.1 Applet</name>
<base-directory>eopro</base-directory>
<include-file>eopro_htmleditor.jsp</include-file>
<client-groups>
<client-group>IE</client-group>
<client-group>MOZILLA</client-group>
</client-groups>
</editor>
-->
```

5. Restart Jahia.

## 1.2. EDIT-ON PRO 3.X

1. Download the 3.x release of edit-on Pro here:

<http://www.realobjects.com/downloads>

You will need to complete a form to request a download link and a trial license key.

2. Extract the content of the directory "eopro" from the original archive file to :

TOMCAT\_HOME/webapps/jahia/jsp/jahia/htmleditors/eopro

3. Put in the same directory the license file "licensekey.xml" you should have received from RealObjects.

4. Open the following file :

TOMCAT\_HOME/webapps/jahia/WEB-INF/etc/htmleditors/htmleditors\_config.xml

and uncomment the following lines:

```
<!--  
<editor>  
<id>eopro3</id>  
<name>Edit On Pro 3 Applet</name>  
<base-directory>eopro3</base-directory>  
<include-file>eopro3_htmleditor.jsp</include-file>  
<client-groups>  
<client-group>IE</client-group>  
<client-group>MOZILLA</client-group>  
</client-groups>  
</editor>  
-->
```

5. Restart Jahia.

Now log in your Jahia server and switch to edit mode, then add or edit a free text area. You should now have in the drop down list the "edit-on Pro applet" line. Select it and edit-on pro will be launched inside the edit window.
