

Periodic Table of the Chemical Elements - Part I

In order to arrange chemical elements in a tabular way, Dimitri Mendeleev, a Russian chemist developed the Periodic Table of Chemical Elements. In 1869, Mendeleev wanted to show the periodic properties of the chemical elements. Since then, the layout of the table has been revised and improved over the years.

Periodic Table of the Elements

Periodic Table of the Chemical Elements - Part II

There are several different layouts for the table, but the most common forms are still pretty similar to the original. New discovered elements have also been added to the table.
