

Tools for Electronic Publishing and Content Authoring

RealObjects provides standards-based, cross-platform software solutions for electronic publishing, content authoring and web-to-print.

PDFReactor

Powerful formatting processor to convert HTML into PDF using Cascading Style Sheets (CSS) to define page layout and styles.

Nimbudocs Editor

Create, manage and share your docs online from anywhere. Join collaborative word-processing sessions with teammates and friends.

edit-on NG

Fully customizable WYSIWYG online HTML editor with Word-like UI. Intuitive word processing within your web publishing workflow.

Project MARTHA

Integrated application framework to create and deploy powerful HTML and XML editing and rendering applications in pure Java.
